September 8, 2022

Postal Regulatory Commission,

This is an addendum to the letter that was sent to the PRC on 06/30/2022. The Addendum input was unable to be made by the *July 31st, 2022 request for Stakeholder Input* because it was published on September 6, 2022.

Below is another example of a USPS rate change where there is NO "FINAL" Prices, Notice 123, USPS SKU Price Files or Automated Price Files (APF) with fewer than 30-days before the October 2, 2022 implementation date.

Correspondence with USPS regarding this topic:

October Time-Limited Price Change - Starting October 2, 2022 Through January 21, 2023

- ***Question posted to USPS on 09/06/2022: When will these (Time Limited Price Change) be finalized?***
- ***USPS Answer: Sometime this week. Additionally, some communication on the CAT cycle of development and availability for testing would help software developers. Bill will follow up with Hardik and discuss on PEEC tomorrow.***

The PRC approved the price changes on [09/06/2022](#). As of 09/08/2022 the changes are still not finalized by the USPS, less than 30-days before implementation. This does not allow software developers adequate time to implement, test and release these changes to customers in a committed capacity.

This erodes customer confidence.

We are again requesting action on this. It is critical that we are allowed ample time. 60-days to have FINAL Price Files, SKU Price and Postage Statements, and any possible impact on presorts or labeling lists is the minimum that vendors are requesting.

Please advise on if action will be taken. Thank you for your time and consideration.

Kind regards,

Kristen McKiernan
President
